MERN STACK DEVELOPER

✉ segacythlhou@gmail.com 📞 9612740978 📍 Kishangarh,Vasant Kunj

SUMMARY

I'm a MERN Stack Developer who loves building full-stack applications with MongoDB, Express.js, React.js, and Node.js. I'm all about writing clean, efficient code and figuring out solutions to tricky problems. I'm looking to join a team where I can keep learning, contribute my skills, and help create software that actually makes a difference.

TECH STACK

Responsive Web Design	● ● ● ● ●	Front-end Skills : HTML,	● ● ● ● ●
Back-end and Database skills	● ● ● ● ○	CSS	

SKILLS

- Knowledge in developing and maintaining web applications using MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Proficient in frontend technologies such as HTML, CSS, and JavaScript
- Strong knowledge of database design, implementation, and optimization using MongoDB
- Strong Knowledge in designing and developing RESTful APIs using Node.js and Express.js
- Proficient in React.js for building user interfaces and state management
- Ability to debug and resolve issues in existing codebase
- Strong problemsolving skills and attention to detail
- Stay updated with emerging technologies and bring new ideas to development
- Ensure the application is optimized for maximum performance and scalability

PROJECTS

E-COMMERCE

Developer

"My e-commerce app is a MERN stack application designed for a seamless online shopping experience. The frontend is built with React and utilizes Axios for API calls, Framer Motion for animations, Recharts for data visualization, and Zustand for state management. The backend ensures security and efficiency with bcrypt for password hashing, ioredis for caching, Cloudinary for media storage, JSON Web Tokens (JWT) for authentication, Mongoose for database management, and Stripe for handling payments."

YOUTUBE CLONE(with mern)

Developer

"My YouTube clone is a MERN stack application with a secure backend built using bcrypt for password hashing, JSON Web Tokens (JWT) for authentication, Mongoose for database management, and Nodemon for development. The frontend is built with React, using Material-UI for styling and Axios for API calls, offering a sleek and responsive user experience."

"This project is still a work in progress and requires further development to enhance features, improve functionality, and deliver a more polished user experience."

YOUTUBE CLONE(rapid api)

Developer

"The YouTube clone is a full-stack application built with React and Axios, using RapidAPI to fetch video data. It provides a smooth and user-friendly interface, allowing users to explore different components and watch videos

seamlessly."

Todo app

Designed frontend and backend

"My first MERN stack app is a todo app where you can add, update, and delete notes. It also lets you upload an image with notes, using Multer and Cloudinary. The app has user authentication and shows the notes in a stylish masonry layout."
